### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronald Citkowski on 4/24/2008.

3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose an apparatus comprising elements being configured as recited in the claims. Specifically, none of the prior art teaches or fairly suggests the following features in combination with the other limitations of the claims:

For claim 1, the prior art fails to teach a method resetting the most significant bit of the first accumulated phase value and the most significant bit of the second accumulated phase value when the most significant bit of both said first accumulated phase value and said second accumulated phase value are simultaneously 1.

For claim 8, the prior art fails to teach a phase comparator further including a first reset means for the most significant bit of the first accumulator, a second reset

means for the most significant bit of the second accumulator, and a third AND means, where the output of said third AND means is connected to said first and second reset means of said first and second accumulator, where the most significant bit of said first accumulator is connected to a first non-inverting input of said third AND means, and where the most significant bit of said second accumulator is connected to a second non-inverting input of said third AND-means.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
